Section 1. Introduction

.

Since joining the OGP in July 2016 on the heels of President Muhammadu Buhari's commitment to a full-scale anticorruption agenda at the international Anti-Corruption Summit organized by the government of the United Kingdom, and his earlier promise to make the fight against corruption a cardinal part of his administration, Nigeria has introduced farreaching innovative reforms such as the BOR aimed at 'exposing corruption; punishing the corrupt and providing support to the victims of corruption; and, driving out the culture of corruption'. At the heart of this success, has been the collaborative efforts of government officials, civil society, the private sector, and parliament, through the vigorous implementation of the 1st and 2nd National Action Plans (NAP I & II).

In recognition of Nigeria's pioneering work in fighting corruption through its new Beneficial Ownership Register (BOR), it received the 2021 Open Government Partnership (OGP) Impact Award at the OGP Global Summit. This innovative reform undergirded by OGP principles seeks to help to halt the flow of illicit funds in the extractives industry. The registry was passed into law in 2020 and is expected to stop the illegal flow of US\$15 billion and introduce new levels of fairness to the overall procurement process. Illicit financial flows drain tens of billions of pounds out of Nigeria every year, which happens in several ways including through abusive transfer pricing, over-invoicing, tax evasion, use of offshore financial banking centres, the smuggling of cash and illicit goods and money laundering.

A report released by the Nigeria Extractive Industries Transparency Initiative (NEITI) put the figure as \$15 billion to \$18 billion annually. Global Financial Integrity ranks Nigeria as one of the largest countries experiencing illicit financial outflows in the world, an assertion re-echoed by the country's Central Bank. These are monies that could be used for creating jobs, improving infrastructure, reducing inequality, and addressing poverty. With the BOR however, it now becomes mandatory to disclose persons with significant control of companies so as to enhance corporate accountability and transparency, thereby enabling public authorities to track the proceeds of corruption and redirect the resources for national benefit

Building on the successes mentioned above, this third National Action Plan seeks to consolidate efforts at combatting corruption and enhancing participation. Specifically, it speaks to 13 commitment areas spread across the open government principles of transparency, accountability, participation, and technology and innovation. It is envisaged that the transformative reforms in this action plan will drive the resolution of key societal challenges, particularly in such a critical time in global and contemporary Nigerian history. The implementation of this plan much more than any other, will galvanize support across the board, raise ambitions, and broaden ownership as well as political leadership.

#### **Overview of the National Action Plan**

The Nigeria OGP multi-stakeholder forum, National Steering Committee (NSC), with equal membership from government and non-state actors, was established with a governance arrangement consisting of two substantive Co-Chairs (State and Non-State representatives) and two Incoming Co-Chairs (State and Non-State representatives), reflecting the principle, practice, and spirit of co-creation that embodies the Open Government Process. The National Steering Committee (NSC) is comprised of representatives from government Ministries, Departments, and Agencies (MDAs), as well as civil society organizations, the organized private sector, and professional associations, who collaborated to co-create this two-year National Action Plan (NAP), with the Federal Ministry of Budget and National Planning serving as the National Coordinating Secretariat.

The Federal Government appointed the Minister of State in the Ministry of Budget and National Planning as Co-Chair (State representation) and the Senior Fellow of the Nigeria Economic Summit Group (NESG) as Co-Chair (Non-State representative), respectively.

The NAP seeks to strengthen and mainstream transparency methods, as well as citizen participation in the administration of public resources across all sectors. This NAP is focused on the following broad themes: (1) fiscal transparency; (2) increasing access to information; (3) environment and climate change; (4) governance (5) civic participation.

The four key criteria that led the NAP III's design and development are as follows:

- 1. The promise must be within the scope of the OGP.
- 2. Issues that were not addressed in preceding NAPs yet had the potential for reformatory change.
- 3. Issues identified at the national and global levels are critical to furthering the OGP principles, such as inclusion, service delivery.
- 4. Issues raised throughout the national consultative process.

The NAP III, an enhancement to the previous NAPs, identifies the expected impact, outcome, milestones, and activities that will produce the expected impact. The OGP NAP III is motivated by the desire to have a measurable beneficial impact on ordinary Nigerians by identifying the factors that impede effective public engagement in government. The NAP III has five Thematic Areas:

- Fiscal Transparency
- Environment and Climate Change
- Governance
- Access to Information
- Civic participation

The NAP III effectively deals with issues of transparency in budgeting, procurement, taxation and natural resource governance, corruption, asset recovery management, freedom of information, communication channels between citizens and government, service delivery and inclusion of under-represented groups in government.

Table 1 below provides a summary of the third National Action Plan commitments by thematic areas:

Tab	le 1: Summary of Third National Action Plan Commitments by Thematic Areas
Fisc	al Transparency
1	To ensure more effective citizens' participation across the entire budget cycle.
2	To ensure effective and participatory audit that completes the budget cycle transparency and
	accountability
3	Full Operationalization of Open Contracting and Effective Deployment and Use of Open
	Contracting Data Standards (OCDS)
4	Extractive Transparency: Public disclosure of extractive sector contracts, licenses, permits,
	payment to government and revenue stream to improve transparency, fiscal terms and
	positively impact public finances
5	Extractive Transparency: Sustained implementation of the Petroleum Industries Act (PIA)
Acc	ess to Information
6	Effective Implementation of the Freedom of Information Act by Public Institutions.
7	Improved the ability of persons including disadvantage groups such as women, persons with
	special needs, illiterate persons & youths to use the Freedom of Information Act to obtain
	information of interest or relevance to them.
Env	ironment and Climate change
8	Strengthening the implementation of the Climate Change Act 2021
Gov	vernance
9	To establish a public register of Beneficial Owners of Corporate Entities in line with Beneficial Ownership Data Standard
10	Institutionalization of SERVICOM operations using legal, legislative or Executive Instrument
Civi	c Participation
11	To sustain and improve the Permanent Dialogue Mechanism for citizens' engagement and
	feedback on governance and service delivery.
12	To synergize and co-ordinate technology-based citizens' feedback on programmes and projects
	to improve service delivery.
13	To create the space for citizens and citizen organizations, human right defenders and the media
	to thrive, express themselves and participate in the different stages of the policy making process
	without fear or intimidation.

Thematic Area:	<b>Fiscal Transparency:</b> To increase transparency in Public Finance Management by entrenching mechanisms for public participation across the entire Public Finance

Budget Office of the Federation  2. A compilation of relevant/usable inputs from the citizens.
3.	Advocate for public hearings organized by the National Assembly on the budget.	January 2023	December 2024	National Assembly's acceptance to conduct required public hearings on 5 or more priority sectors of budget.	<ol> <li>Number of public hearings on the budget organized by the National Assembly (NASS).</li> <li>Number of Sectors in which public hearing were held by the NASS</li> </ol>
4.	Mobilize CSOs' and citizen participation in budget hearings.	January 2023	December 2024	CSOs' and citizens' willingness and preparedness to attend the public hearings on budget.	<ol> <li>Number of CSOs that attended the public hearings.</li> <li>Number of citizens clusters that attended the public hearings.</li> </ol>
5.	Annually publish a comprehensive citizen's guide to the budget.	January 2023	December 2024	Two citizens' budget guides published and widely circulated.	Number of copies (hard/softcopies) printed and circulated each year.
6.	Conduct annual citizens' satisfaction surveys.	January 2023	December 2024	Two Annual Citizens' Satisfaction Survey Report	Number of Segmented reviews on citizens' satisfaction across different subsectors carried out
7.	Timely publish all key budget documents to facilitate citizens' participation according to the Fiscal Responsibility Act.	January 2023	December 2024	All relevant documents published on time.	Average time for production of audit reports

8.	Publish MDA budgets, as well as quarterly and annual budget implementation reports on MDAs websites in both human and machine-readable formats.	January 2023	December 2024	Sustained availability of the following on MDAs websites in human and machine-readable formats:  1. MDA Budgets. 2. Quarterly MDAs budget implementation reports. 3. Annual MDAs budget implementation reports.	Number of MDAs publishing budget implementation reports in accordance with the Fiscal Responsibility Act (FRA) on their websites.
9.	Update the existing technology-based feedback mechanism to give feedback on reported projects for monitoring by government and CSOs.	January 2023	December 2024	Application of the selected technology-based mechanism in monitoring of public projects across the country.	Number of public projects that are uploaded on the technology-based feedback platform per budget cycle by government and CSOs.
10.	Enhancing transparency on Import Duty Exemption Certificate (IDEC) and other Customs revenues	January 2023	December 2024		
11.	Enhancing awareness around TaxPromax	January 2023	December 2024	Number of citizens and private sectors reached.	Number of awareness outreaches on TaxPromax carried out.
12.	Enhance approaches for an inclusive community participation in allocation of public resources for improved and effective public service deliveries	January 2023	December 2024	<ol> <li>Advocacy for earmarking the sugar tax for improvement of the health sector allocation.</li> <li>Advocacy for effective implementation of "ear-marked" taxes from the total revenue to fund socioeconomic sector</li> </ol>	Number of tax distribution framework developed

				spending.	
13.	Build community capacity on the use of the Community Charter of Demand.	January 2023	December 2024	Development of a Community Charter of Demands	Number of community demand documents produced
14.	Creation of an online Tax Risk Dashboard	January 2023	December 2024	<ol> <li>A functional Portal showing potentiality of Risk</li> <li>A feed back window for suggestion and whistle blowing</li> </ol>	<ol> <li>Number of Functional Tax Risk dashboard</li> <li>Number of people utilizing the feedback window</li> </ol>
3.	Creating Information Cycle to mobilize for the Supposer of Significant Economic Presence (SEP) Uptake	January 2023	December 2024	To reach out to Citizens on SEP To canvas to citizen to report transitions online if tax elements is not deducted

Brief	This commitment addresses issues around opacity, corruption, resource wastage and
Description of	quality of services delivered to Nigerians through wider stakeholder participation in the
Commitment:	procurement spectrum. It will prioritize the integration of the NOPOCO and the EGP portal
Communication.	to ensure timely data publication and availability, and drive use of published data by
	different categories of stakeholders for optimal results. This commitment will ensure
	inclusion of relevant stakeholders such as Women and Youth groups, Private sector
	stakeholders and State-Based Organizations to access, use and report on the impacts of
	published data.
General Problem	Despite the deployment of NOCOPO, stakeholders still face the challenge of accessing
/ Challenge	procurement data. This challenge is due to low levels of compliance to the directive on
Addressed by	disclosure of procurement data and unavailability of data across stages in the
the	procurement cycle. With Government commitment to deploy the Electronic Governance
Commitment:	Platform (EPG), more could be done to fill in the existing data gaps and to effectively
	capture the entire contracting process in a single portal.
Specific OGP	Effective Implementation of open contracting to improve public service integrity and
Issue(s) in Focus:	processes, inclusion of actors relevant in the discourse and use of procurement data for
	improved governance and service delivery.
Rationale for the	Open Contracting can offer the following values through the use of innovative technology
Commitment:	to increase access to procurement information:
	1. Transparency: The enhanced disclosure of procurement data and information across
	the entire procurement cycle and up to implementation stage will make the
	procurement process more transparent and reveal how public resources are
	expended.
	2. Accountability: The enhanced disclosure of procurement data and information will
	ensure that citizens understand the basis of decisions made along the procurement
	cycle. This will make the decision makers take actions that reflect better use of public
	resources, knowing that their actions can be challenged through existing resource
	mechanisms.
	3. Service Delivery: The use of open contracting helps the government to achieve value
	for money by providing a watchdog system that allows wider stakeholders to
	critique and monitor implementation of contracts. This ultimately, checkmates
	unethical conduct and sharp corrupt practices in the processes of contract delivery.
	4. Inclusion: Technology provides wider stakeholder participation in open contracting,
	thus limits human interface. This will allow stakeholders from all walks of life to
	interact, access, assess and give informed feedback on how government programs
	impact their lives.
	Citizen engagement: Availability of procurement data across the entire procurement
	cycle and up to implementation will ensure that all stakeholders are able to monitor
	the procurement activities and provide feedback. This will ensure that public
	contracts are delivered with value for money achieved, thereby leading to increased
** ***	service delivery
Main Objective:	To improve accountability and transparency of public procurement processes; promote
	wider stakeholder participation and better service delivery through the implementation
	of OCDS

## Brief Description of Commitment:

There have been commendable efforts in the extractive sector to enhance transparency and accountability. For instance, the National Oil Company, NNPC, has published monthly operational and financial statements since 2015, engaged with CSOs and citizens' groups and openly broadcasted bid opening rounds for new licenses. NNPC has also committed and actively participated in the global processes including the OECD and the Extractives Industries Transparency Initiative (EITI) Commodity working group, working towards bringing further transparency to commodity trading by States Owned Enterprises globally. The Ministry of Mines and Steel launched the 'Road Map for the Growth and Development of the Nigerian Mining Industry' in September 2016 which identified some initiatives within the short, medium and long-term timeline which the Ministry can undertake to better position Nigeria's mining sector.

Despite these efforts, the extractive sector still has not fully delivered on developing and improving the well-being of the vast majority of citizens. The pace of reform has been slow and there is still widespread opacity in the industry which has allowed corruption to thrive. In the case of the oil and gas sector, deepening issues of underassessment, underpayment and under-remittance/non-remittance of revenues due to government have limited what the government can deliver to improve the lives of citizens. A backlog of remedial actions, especially as identified by NEITI audit reports, to improve accountability across financial, processes and production has not been prioritized or implementation has been too slow leading to further leakage and loss in citizens' confidence.

A first step towards achieving transparent, broad-based and effective citizens' participation in the extractive sector is to **publish contracts** which are the fundamental documents that set out the terms of all investments and projects in the sector. Contract disclosure in the oil, gas and mining sector is increasingly a global norm with progress by governments, international financial institutions and the EITI making bold steps to disclose or require public disclosure. The Government of Nigeria has made several commitments to publish petroleum contracts including at the 2016 UK Anti-Corruption Summit where the President committed to working towards full implementation of the Open Contracting Standard, and the 7 Big Win's that commits to publishing all established fiscal rules and contracts within two to four years. A growing number of companies with operations in Nigeria also have expressed support for contract disclosure, the majority of these companies have noted, however, that in their view the decision to publish contracts must be initiated and implemented by the government.

Transparency and accountability remain the basis of a sound corporate governance regime. The OECD's position is that information disclosure and higher standards of accountability in SOEs, coupled with other governance reforms can contribute to improved efficiency and performance of SOEs. Best practice and global standards demand that information disclosure including both financial and non-financial data is essential for the government, so it can be an effective owner; oversight from the National Assembly; the media to raise awareness on SOE efficiency; and taxpayers and the general public to have a comprehensive picture or SOE performance. Transparency, driven by enhanced

	T								
		disclosures, constitutes a major component of an SOE's accountability to shareholders,							
Canaval Duahlam		ntial investors and business partners, and an increasingly engaged civil society.							
General Problem		Recent years have seen intense debates between the government, the NASS and

Brief Description of Commitment:  This commitment seeks to ensure effective implementation of the Freedom of Information Act regarding record management, mandatory publication, reporting obligation and responsiveness to FOI request by Public Institutions.  There is a dearth of information available to the public occasioned by poor record management systems and practices in public institutions; inadequate budget/funding to address these challenges, absence of training and retraining of staff on these are other issues, unwillingness on the part of some public institutions to facilitate public access to public records as well as failure to perform proactive disclosure obligation by public institutions. This has led to ineffective implementation of the FOI Act is Public Institutions in Nigeria.					
Specific OGP	1. Public participation in governance				
Issue(s) in Focus:	2. Opacity of information on government affairs and activities				
Rationale for the Commitment:	3. Corruption There is currently low compliance with this provision of the FOI Act by public institutions, thus, disempowering the public and affecting public trust in government.				
Main Objective:	To ensure that information held by public institutions are created, stored and maintained in a manner that guarantees availability and accessibility to the public to empower the people to make informed decisions. This will also ensure the public have and are able to enjoy the right of access to information towards contributing to policy formulation or review of extant policies.				
Anticipated Impact:	ective implementation of the FOI Act, efficient record management, mandatory blication, compliance to Annual Reporting obligations by public institutions and empt responses to FOI requests by Public Institutions				
Expected Outcomes	Milestones (Performance Indicators)				
1. Improvement FOIA implement process by Institutions increase in number of institutions that structures fo implementation FOI Act by 2024	1. At least 300 public institutions will develop structures for the implementation of government policies on records management by 2024 2. Increased level of responses to FOI requests released to citizens 3. Existence of accessible, physical and digital database of activities and records of public institutions Increase in the number of public institutions that submit their FOI annual reports to the AGF to at least 300				
2. Increased effici handling processing requests by institutions	ency in  and  Percentage change in the frequency of ignored FOI requests, timelines of  response and hours spent in retrieving and responding to requests by public  public institutions.				
3. Commitment Accounting and CEOs to ef	of of officers of ficers fective 1. At least 300 public institutions make provisions for record management and implementation of FOIA

#### Section 5.

### National Action Plan Implementation and Co-ordination Framework

#### 1 Context

The OGP governance framework in Nigeria seeks to model the international mechanism. The process requires multi-stakeholder engagement and equal representation of government and non-state actors in the Steering Committees.

Against this background, Nigeria has a twenty-member National Steering Committee made up of ten government agencies, as well as ten Civil Society Organizations, private sector institutions, and professional bodies whose mandates cut across the OGP thematic areas.

It is important to state that the membership of the National Steering Committee is for two years, spanning the lifecycle of a National Action Plan, with fresh elections scheduled for the end of every implementation phase This will give other Ministries, Departments and Agencies, Civil Society Organizations, and private sector actors the opportunity to become members of the National Steering Committee.

Following recommendations from the Global Support Unit and mirroring international best practices, the National Steering Committee for the implementation phase of the third National Action Plan will be constituted by twenty organizations; ten from government Ministries, Departments and Agencies and ten from Civil Society Organizations, Organized Private Sector and Trade Unions.

#### 1 National Steering Committee

The National Steering Committee (NSC) is drawn from civil society, private sector institutions and government agencies, and will meet quarterly unless there is an urgent need to convene the NSC.

The roles of the NSC are to:

- Set high-level strategy, policies, and procedures.
- Provide targeted outreach and support to encourage members, government institutions, and non-state actors to meet their OGP commitments.
- Help with fund raising.
- Represent OGP and promote its accomplishments on the international stage.
- Set a strong example by upholding OGP values and principles and make ambitious commitments.

- Recruit and brief new Steering Committee members during the third phase of the National Action Plan;
- Connect the OGP Secretariat to key potential partners; and,
- Approve the Budget of the OGP Secretariat and annual work plan.

### 2 Co-Chairs for the OGP National Plan (Governance and Leadership Sub-Committee)

Four co-chairs will lead the NSC. It comprises the lead government co-chair and an incoming government co-chair, one co-chair and an incoming co-chair from the nonstate actors. The four co-chairs and the National Coordinator/Executive Director of the OGP Secretariat will also serve as the Governance and Leadership Sub-committee of the NSC. Their responsibilities are to:

- 1. Ensure vitality of OGP leadership by recruiting and orienting new members and new cochairs of the National Steering Committee.
- 2. Work with the OGP Secretariat National Coordinator/Executive Director to plan and run Steering Committee meetings.
- 3. Hire and Supervise the National Coordinator/Executive Director.
- 4. Ensure sufficient funding for the OGP to achieve strategic objectives; and,
- 5. Provide financial, legal, and ethical oversight.

#### 3 OGP Secretariat Management Team

The OGP Secretariat will be led by the National Coordinator/Executive Director supported by a minimum of four Senior Advisers, namely the, (i) Civil Society Adviser, (ii) Public Sector Adviser, (iii) Communications Adviser and (iv) Subnational Engagement Adviser. There will be four support staff on finance and administration, monitoring and evaluation/independent review, technology, and innovation. The Roles of the Advisers shall include:

#### 1.4.1 Adviser on Civil Society

- Build and maintain trust and credibility with civil society organizations.
- Design effective engagement strategy and work plan.
- Design and jointly implement civil society programming and activities.
- Support Civil Society Partners to constructively engage the OGP process.
- Build partnership between the private sector, businesses and the OGP Platform.

#### 1.4.2 Adviser on Public Sector

- Provide advisory support and guidance on all public sector issues as it relates to engagement of government agencies with the OGP process.
- Maintain communication with MDAs responsible for implementing specific commitments during the NAP implementation period.
- Contact MDAs responsible for implementation of specific commitments to get information on progress for inclusion in the self-assessment report.

# 1.4.3 Adviser on Communications

- Provide necessary input and guidance to implement the communication strategy in line with management decision.
- Build partnerships between all forms of media and the OGP process.

#### 1.4.4 Adviser on Subnational Engagement

• Responsible for developing and building the relationship between the OGP process and the various states.

#### 4 Support Staff

The Secretariat is made up of the National Coordinator/Executive Director and support staff that work directly with him/her. They cover crosscutting areas such as technology and innovation, monitoring and evaluation, administration, and finance. The National Coordinator/Executive Director will be at liberty to hire more support staff if the need arises, subject to the availability of funds.

#### **5 Working Groups**

Working Groups will be established along the OGP working groups –5 (five) thematic areas as well as the three crosscutting issues identified in the NAP III. Co-Chairs selected by each working group will lead the Working Groups made up of Representatives of Ministries, Agencies, Departments, CSOs and private sector depending on expertise. They will be elected every two years by the members of the working groups. The Working Groups will also be required to develop their terms of reference and guidelines with the support of the OGP Secretariat.

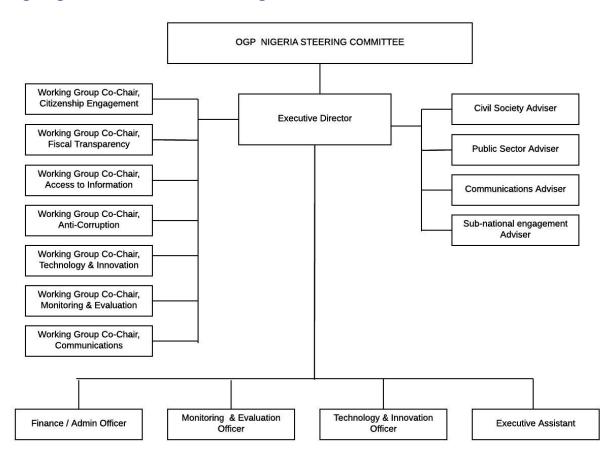

#### 6 Funding

In its design, funding, and implementation, OGP is not being treated as a stand-alone "project." For the process to be successful, there is need for it to be largely funded through the government's annual budget, including contribution from agencies that have primary

responsibility on commitment areas. However, Development partners and Civil Society Orgnizations with interest in promoting good governance, accountability and transparency focused reforms in Nigeria will continue to support the process by providing financial and technical assistance to the OGP Secretariat and to sub-nationals in line with the co-creation spirit of the OGP.

It is also expected that the National and Sub-national governments that have signed onto the OGP Commitments would set aside some funds for the purpose of developing National and State Action Plans, training of its officials and for the implementation of the OGP National and sub-national Action plans.

# 7 Organogram of the OGP Process in Nigeria

#### Section 6.

## **Crosscutting Areas**

To ensure effective implementation of Nigeria's OGP commitments, the NAP III includes three crosscutting areas of work. These are: (1) Technology & Innovation; (2) Monitoring & Evaluation; and (3) NAP Communication Strategy. The NSC agreed that achieving all commitments and objectives under the NAP III would require the effective use of these three tools and has established three specific working groups tasked with the responsibility of integrating these tools into the commitments under the thematic areas, and work closely with MDAs and civil society in the use and implementation of these tools. The tools remain relevant in achieving all commitments and objectives under NAP III

#### 1 Technology and Innovation

The use of technology to provide greater access to information and data is at the heart of an open and transparent government. The NSC recognizes that Technology & Innovation cuts across all five OGP thematic areas and that appropriate solutions and infrastructure are required to deliver on each of the commitments. Therefore, a specific Technology & Innovation Working Group has been established to:

- Identify existing government IT solutions and infrastructure that are available for the implementation of OGP commitments.
- Establish what their status is and what gaps exist.
- Recommend how those gaps can be filled through improvements in existing systems and infrastructure or the use of new and innovative tools that are realistic given the present economic realities.

In addition, Nigeria is establishing a Central Open Government Information Platform that will serve as the OGP Nigeria portal/website, to make information sharing with the citizens and civil society easier and more efficient. This public-facing platform will be real-time, sharing information with Nigerians about the progress on implementation of the OGP NAP commitments and other relevant governance information.

The National Information Technology Development Agency (NITDA) has a mandate which includes improving access to public information, imbibing transparency into government processes using IT, and ensuring that IT resources are readily available to promote efficient national development. This mandate aligns directly with the OGP principals and objectives. In line with that, NITDA and the Technology Working Group will:

- Conduct a prioritized audit of IT capacity and gaps within MDAs relevant to the OGP process.
- Address identified IT gaps in order of priority, considering limited timeline and resources.
- Provide a continuous technology support mechanism to the OGP commitments.
- Ensure that all technological implementations across relevant MDAs conform to global information technology standards to guarantee systems interoperability for effective support of OGP commitments.
- Establish the Central Open Government Information Platform and ensure that it interfaces seamlessly with the electronic platforms of MDAs relevant to the OGP NAP implementation.

#### 8 Communication Strategy

Recognizing that openness in and of itself is not an end to achieving transparency and accountability, the NSC has included within the NAP III a strategy for the use of both existing and new platforms for citizens engagement and feedback on the five NAP III thematic areas. The Communications Strategy includes methods to reach out to citizens directly through civil society, religious leaders and influencers, elected representatives, and the media. It will employ the ACADA (Assessment, Communication, Design, and Action) concept in the development and implementation of this communication strategy. Key elements of the strategy include:

- 1. A reorientation of the psyche of public officials to their responsibility to the citizenry and stakeholders, including donors, businesses, and civil society, to account for the management of the commonwealth, government revenue, loans, and grants.
- Increasing awareness by citizens of their right to reports of stewardship by public officials, the right to information on demand as provided for by the Freedom of Information Act 2011 (FOIA), and the right to a minimum standard of service delivery from public institutions that possess a direct interface with the public in the provision of services.
- 3. Reducing the communication gap between the government and its citizens by the identification and adoption of existing or establishment of new, credible, and robust feedback mechanisms, which promote transparency and support participation in governance by the citizens and other stakeholders in the business of governance.

Through this, citizens will be better informed about the progress made towards the implementation of OGP commitments and can hold government to account. This includes

understanding their rights under existing and new laws, along with the obligations of government and the private sector regarding openness and transparency.

## 9 Monitoring and Evaluation

Internal Monitoring & Evaluation (M&E) of the NAP implementation is important for MDAs to ensure that (i) they are on track to fulfill their obligations under each commitment; (ii) assist the NSC to oversee the implementation process and identify potential gaps and determine where support and resources are needed to be directed; and (iii) for citizens, the private sector, civil society and the media to hold government to account with respect to delivering on its OGP commitments. The NAP III will use a Results Based Management (RBM) Framework, along with appropriate output and outcome Key Performance Indicators (KPIs), crafted to track achievements, results and impacts of OGP commitments. The M&E system will be presented in a simple template for ease of implementing MDAs and civil society to monitor and evaluate progress.

Each of the 13 commitments articulated in the NAP III have KPIs that will guide the M&E process. Through consultation with stakeholders, the M&E framework will include acceptable results (what should be expected or seen) for each commitment area. Each of these results will be reviewed with respect to how they link to citizens' needs and there will be agreed indicators for these results. The method to capture results most effectively will be agreed upon as well as who will be responsible for this, within the MDAs.

The results framework will give a clear view of the performance status of the commitments at a glance. It will be sequentially presented, linking commitments to ambitions (outcomes/impacts) and indicators to ensure that implementation of activities (milestones) is purposeful, and results oriented. The OGP focus areas of openness (Transparency, Accountability, Public Participation and Technology / Innovation) provide direction to specific commitments captured in the NAP. Therefore, this M&E strategy recognizes that the performance of each of the commitments in the NAP will be measured against the four focus areas to determine the overall level of change that has been achieved. A yearly qualitative assessment will also be conducted across the commitments to ascertain the level of openness regarding each of the four openness areas. Prior to the qualitative assessment, a set of questions/checklist, in addition to the KPIs contained in the results framework, shall be prepared to ensure consistency in assessment. In addition, the M&E Specialist will be responsible for providing technical support by providing technical guidance and capacity building at the National and sub-national levels in line with the performance management process of the OGP.

## Sub-National Engagement and Pilot State Commitments

#### Context

The Subnational OGP Program had 24 states signing up to the OGP process with two of those states (Kaduna and Plateau) as well as the Abuja Municipal Area Council (AMAC) joining the Global OGP Local Program as a pilot sub national. The International Steering Committee discussed the pilot phase of the Local Program to assess its impact and decide its future while setting up task force to review the existing strategy and recommend the best approach for the expansion of the program. The taskforce studied subnational OGP processes through interviews with 90 actors from 27 countries, including Nigeria, involved in the OGP local program and made recommendations on how best to expand OGP Local Program. It completed its work and presented the report to the International Steering Committee in May 2019 during the 2019 OGP Global Summit in Ottawa, Canada, upon which the following recommendations were approved, and the Global Support Unit authorized to develop an implementation strategy immediately:

- Strategic national-local vertical integration: Recognizing that open government reforms can have more impact and be made more sustainable when national open government reforms are localized and when local innovations are scaled; support the further development of effective national government and/or civil society strategies to enable and foster local open government. This would include supporting national government and civil efforts to promote open local government within OGP National Action Plan processes or through separate national initiatives.
- Enhanced OGP Local program: Building on the successes and lessons learnt from the pilot program, develop a new "OGP Local" program that incentivizes local ambition and innovation; supports more local governments and civil society actors to co-create and implement open government commitments that respond to citizens' interests; and creates cohorts of local participants that can support each other and inspire others. The new program will retain some of the core features that drove the success of the Local program co-created action plans, monitoring, opportunities for peer learning but will be made less resource intensive by redesigning the approach to monitoring and support provided to individual participants.
- Platform for knowledge, learning, innovation, and capacity building: A core part of OGP's medium-term vision is for it to become a platform for sharing knowledge, learning and innovation on open government, and to be a source of capacity building tools and resources for governments and civil society working on open government reforms within and outside OGP. The expansion of OGP Local has this vision at its core. OGP will use a combination of online and offline tools to create opportunities for local

level reformers to share knowledge, access expertise from partner organizations, and to receive trainings at a much larger scale than has been possible so far. In this way, OGP's local community will be at the forefront of a partnership-wide vision for a more collaborative platform for learning.

The recommendation drew strongly from Nigeria's approach and provides opportunity for better coordination with learning and peer-exchange among states.

#### A Framework for Participation in the OGP Process by States

Any State seeking to join the Open Government Partnership (OGP) in Nigeria must demonstrate a minimum level of commitment to open government principles in four key areas, namely:

- 1. Fiscal Transparency
- 2. Access to Information
- 3. Asset Disclosures by Public Officials, and
- 4. Citizen Engagement

Such commitment will be demonstrated by outlining steps already taken by the State in question to improved governance in the above areas. The State must also further make a specific commitment in its "letter of intent" to further improve governance in these four areas, at a minimum, and must endorse the Open Government Declaration (contained in: <a href="https://www.opengovpartnership.org/open-government-declaration">https://www.opengovpartnership.org/open-government-declaration</a>).

Any State that desires to join OGP Nigeria and is able to satisfy these requirements may then take the following steps:

- 1. Review and understand the National Action Plan.
- 2. Write a letter of intent to the Co-Chairs through the OGP Nigeria Secretariat in the Federal Ministry of Justice to express intent to join the OGP in Nigeria.
- 3. Upon receiving the letter of intent, the OGP Nigeria Secretariat should verify the claims made by the State about the steps already taken by the State to improve governance in the four areas identified above. The Secretariat may undertake such verification by asking for supporting evidence from the State in question, by visiting the State and interviewing relevant stakeholders to establish the veracity of the claims or, where possible, conducting desk or online research to obtain relevant information.
- 4. If satisfied that the State in question has satisfactorily demonstrated a minimum level of commitment to the open government principles, as required, and has expressed its commitment to further improve governance in the relevant areas, the OGP Nigeria Secretariat shall forward to letter of intent to the Co-Chairs with a recommendation that the State in question be admitted into or denied membership of OGP Nigeria, as

- the case may be, with a summary of its findings with regards to the steps already taken by the State.
- 5. Upon receiving the letter of intent, each Co-Chair will respond to the OGP Nigeria Secretariat stating his or her decision on whether the State in question should be admitted into OGP Nigeria or denied membership.

If most of the Co-Chairs vote to deny the State membership of OGP Nigeria, the State shall be informed in writing by the OGP Nigeria Secretariat that it will not be admitted into OGP Nigeria.

If the State remains desirous of joining OGP Nigeria and is willing to apply in the future to be admitted, it may seek the advice of the OGP Nigeria Secretariat on how to improve governance in the State along the four key areas identified to become eligible. The OGP Nigeria Secretariat may then work with and support the State government and other stakeholders in this process.

If, however, most of the Co-Chairs vote to admit the State into OGP Nigeria, the OGP Nigeria shall duly inform the State in question in writing, and advise the State about the next steps for formal acceptance into the OGP Nigeria Family, which will include some or all the following steps:

- In collaboration with the OGP Secretariat in Nigeria, the State will be expected to organize a workshop to bring together relevant government institutions and relevant civil society organizations and private sector institutions to discuss OGP principles to determine (i) the persons who should be members of the State Steering Committee as well as those to serve as Co-Chairs, and (ii) the Commitments that the State should make in its State Action Plan.
- 2 States will send the list of the State Steering Committee members and Co-Chairs as well as the commitments from the state to the Co-Chairs of the National Steering Committee. Such commitments will be expected to reflect issues of transparency, accountability and participation of citizens in line with the priorities and context of the State in question.
- 3 The State will thereafter inform the OGP Nigeria Secretariat if it requires assistance to develop the State Action Plan around its commitments and indicate the nature of the assistance required.
- 4 Each State admitted to OGP Nigeria in this manner would be expected to formally send a request to the OGP Nigeria Secretariat for training of the State Steering Committee members and Co-Chairs on the development and implementation of the State Action Plan.

#### Section 8.

#### Conclusion

The process of preparing NAP III involved robust consultations with civil society and relevant government agencies. The partnership that the civil society and government provided ensured that the content of this plan was co-created from the beginning. Such a robust participatory process inspired a communication strategy that will enable both government and the citizens to take complete ownership of this plan and what it intends to achieve. It is expected that civil society will co-creatively partner with government to ensure that implementation be consistent with all aspects of the promises contained herein. Policy makers at all levels of governance are expected to remain open to receive constructive feedback and suggestions on ways to improve the implementation of the NAP III and maximize its impact.

As we proceed on these positive steps in our nation's journey from transparency to accountability and ultimately, improved service delivery, the Nigeria OGP Secretariat and the National Steering Committee stand ready to work hand in hand with all stakeholders to ensure that a more open and transparent government delivers the equitable and sustainable development that meets citizens' desire for tangible improvements in service delivery.
